

Consulate General of India Osaka-Kobe

26TH FEBRUARY (TUE)
10:00~13:00
OSAKA CHAMBER OF
COMMERCE AND INDUSTRY 4F

Understand and Leverage Your Competitive Advantage in India

Specific Market Entry and expansion strategies essential to be successful in India.

Many Japanese companies have been actively seeking other geographical areas for the purpose of investment. These companies are targeting Asian countries, as these are viewed as culturally and geographically closer to Japan. In this regard, India in particular has the requisite market size and economic growth potential. As a result, Japanese companies are increasingly looking to the Indian market as a key investment destination.

According to a UN report, India is estimated to hold the largest population in the world by 2022, with an expected population of 1.7 billion citizens by 2050. According to the Asian Development Bank, India's economic growth rate is estimated to be 7.6% in 2019. Furthermore, India has significantly improved in its "Ease of Doing Business" rankings by the World Bank, from 142 in 2014 to 77 in 2018.

While considering to invest into India, Japanese companies might face differences in business styles, culture, and employee management etc.

In this seminar, we will provide an overview of the Indian market, market entry options, detailed solutions for problems relating to personnel and organization, and finally, actual Success stories of market entry.
